

Bio-Sense™ Lawn

For Greener, Healthier and Stronger Lawns

Bio-Sense™ Lawn is a complete turf fertilizer designed to help grow thicker, healthier lawns. Blended by Midwestern BioAg, Bio-Sense is formulated using years of agricultural expertise to bring large-scale production benefits to homeowners. Apply Bio-Sense Lawn to your yard for season-long growth and performance.

Product Characteristics:

- **A Complete Nutrient Package:** Bio-Sense Lawn contains nitrogen and potassium, plus other important nutrients like calcium, sulfur and trace minerals to help keep your lawn green and soft.
- **Gentle on Plants and Soil Life:** Bio-Sense Lawn fertilizer contains materials that stimulate and support both soil microbes and grass roots. This can help improve overall soil structure and lawn resilience. Healthier lawns hold water better, helping grass stay green longer during droughts.
- **Season-Long Availability:** Our lawn fertilizer is blended with Environmentally Smart Nitrogen, or ESN®. ESN is a polymer-coated nitrogen source that helps prevent nutrient runoff. This helps keep nutrients in your lawn and out of waterways.
- **Greener Lawns:** Bio-Sense Lawn fertilizer supports a longer stay-green period with fewer applications. Fewer applications means more time spent with your family and less time spent on your lawn.

Product Analysis:

Nitrogen (N).....	17%
Phosphorus (P).....	0%
Potassium (K).....	7%
Calcium (Ca).....	4.3%
Sulfur (S).....	6.5%
Boron (B).....	0.05%
Manganese (Mn).....	0.05%
Zinc (Zn).....	0.05%
Copper (Cu).....	0.02%

Ingredients:

Ammonium sulfate, encapsulated urea, potassium magnesium sulfate, sulfate of potash, calcium sulfate, calcitic lime, compost, borate, copper sulfate, manganese sulfate, zinc sulfate, and kelp.

Typical Application Rates:

Apply one 25 pound bag per 4,000 to 6,000 square feet. Repeat application three to four times per season.
